YOUR ENERGY FUTURE STARTS NOW

INTELLIGENT ENERGY MANAGEMENT

Key Challenges

Business leaders, pressured by current economic conditions, are facing common challenges:

- Less money for customer retention and acquisition programs due to less disposable income
- Stricter budget constraints due to current economic climate
- Limited access to capital for growth and renovations due to current loan requirements
- Sluggish and unpredictable economic activity
- Sustainability goals, though necessary, that create even more budget constraints

Turn-Key Solutions

The Constellation team can provide you with energy management choices that can help stabilize your energy costs and achieve your risk management goals.

- Customized electricity and natural gas pricing to help stabilize and manage energy costs
- Participation in load response programs that can provide eligible companies with additional revenue
- Purchasing green power for all or part of your energy needs to earn renewable energy certification

In times of economic uncertainty, market unpredictability and budget cuts, how might you proactively manage your energy budget?

More and more businesses are turning to one of the nation's leading competitive suppliers of electricity, natural gas and energy products and services—Constellation.

Energy has risen to one of the top five expenses for many businesses. Today, more business leaders are looking to Constellation to develop energy strategies to help manage these costs.

As the endorsed energy supplier to the Chester County Chamber of Business and Industry, Constellation helps members like you develop energy management solutions to protect their bottom line. Teaming up with Constellation allows you to take advantage of powerful benefits offered to Chester County Chamber of Business and Industry members. These benefits include:

- Flexible purchasing options
- Knowledgeable, dedicated energy representatives
- Customized energy plans
- User-friendly online energy management tools
- Transparent billing

Intelligent Energy Solutions

You can help maximize the value of your energy investment with innovative options, competitive pricing and strategies.

Electricity

Many businesses today have tremendous potential to help manage their electricity costs and risk over time through a range of options—from simple fixed price and index arrangements to a variety of blended solutions.

Load Response

Load Response is a diverse offering of solutions that can be combined to create one of the biggest energy cost offsets. If you are willing and able to curtail energy use in response to various grid conditions, Load Response programs can help you earn revenue that can be used as energy offsets while minimizing the risk of sudden disruptions.

Renewable Energy

You can easily enhance your sustainable energy strategies by procuring varying amounts of green power—up to 100%—and receiving certification and promotion material to validate your efforts.

Constellation independently offers additional products, including:

Natural Gas

You can fix all or a portion of your gas volume while purchasing the remainder at a spot or index price. Choose from a host of full-service solutions that range from simple to complex, with varying degrees of budget certainty and risk.

Solar

With no up-front capital required, you can choose Constellation to design, build, own, operate, and maintain an on-site or utility scale solar project. Constellation also offers other options that fit your energy strategy and budget.

Energy Efficiency

Through the implementation of energy conservation measures, you can customize solutions to reduce your organization's energy consumption, save money, and enhance efficiency. An improved load profile positively impacts future power costs and enhances the ability to meet mandates and sustainability goals over time. You can also save money and energy by combining a power contract with high-impact efficiency measures.

Trusted leadership. Proven knowledge.

When you work with Constellation, you get the benefit of working with a national leader in energy management. We have been in the energy marketplace for more than 12 years, providing electricity and natural gas to businesses like yours. The Constellation team can bring its insight to help you enhance your financial strength and stability through better energy management.

About Constellation

As a leading integrated energy company, Constellation touches every aspect of the energy value chain. We can help members like you free up capital and regain control of operational expenses through a turn-key financial solution. Customers across the U.S. rely on Constellation to help them intelligently buy, manage and use energy.
